

How to Change Advisor

Step 1: Get your new advisor to send you their unique code.

Step 2: On the BitDirect platform, navigate to change advisor.

The screenshot displays the BitDirect user interface. On the left is a sidebar with navigation options: Home, Hardware Device, Send, Receive, Transactions, Fees, **Change Advisor** (highlighted with a red arrow), Change Password, and Settings. The top right of the interface shows the user's Bitcoin balance as $\approx \$27,357$, their email address `clientl@bit.co.za!`, and a **Log out** button. The main content area features four summary cards: **BITCOIN BALANCE** (Balance: 0 ~ \$0), **ACCRUED FEES** (0 ~ \$0), **ADVISOR FEE** (0.75 %), and **WITHDRAWALS**. Below these cards is a **Search Advisor** section with a form containing the label **New Advisor Code:**, an input field, and a **SEARCH** button.

Step 3: Paste your advisor's unique code in the field. Ensure that the details are correct. Click "Next".
